

Practice Policy Update Regarding COVID-19

To all our dear patients, families and friends, it is with much thought and consideration that we have made the decision to suspend any non-emergency dental procedures.

Our office will be proactively closing March 16-April 10, evaluating the situation as the days go on. If you are a patient of record and have an emergency, call us, we will make sure you are comfortable and cared for. Should you require emergency dental care, please call our office as you normally would at (706-867-9553) and Dr. Zeng will get in touch with you.

The safety and well-being of our patients continues to be our primary concern. We will continue to monitor the status of COVID-19 nationally and within our community and keep you up-to-date regarding our plans to reopen for business as usual.

As we take this time to limit potential exposure within our community, we will be actively working to come back stronger and better than ever. We will get through this. Have faith. Follow the recommendations of our leaders. Stay calm. Stay healthy.

We are honored to be a part of your healthcare team and look forward to serving you in our normal capacity again soon.
