

YOUR HEALTH  
IS OUR TOP  
PRIORITY

ENJOY A  
BREATH OF  
SURGICALLY  
CLEAN AIR

## Surgically Clean Air for our patients and staff

- The Surgically Clean Air system is a world-class medical-grade indoor air cleaning system, equipped with a 6-stage filtration process that's designed to remove Chemicals, Toxins, Germs, Odors, and most importantly kill airborne Viruses, to help reduce the spread of illness. Its HEPA-Rx\* filters meet or exceed the guidelines for general surgery applications and have been independently tested to remove 99.998% of particles at 0.1 microns.

***Surgically Clean Air's JADE Air Purifier*** is one of the Most Advanced on the Market. In response to the COVID-19 pandemic, and to ensure our office is free from viruses and bacteria, three JADE units have been installed.

# DAHLONEGA DENTISTRY

- We also have been using **Ultra Low Volume (ULV) Cold Fogging** with hypochlorous acid (**HOCl**) to disinfect every room in our office. HOCl is well-studied, high predictable, noncorrosive, nontoxic, powerful oxidizing agent against numerous types of viruses and bacteria. **It inactivates COVID-19 Virus.**

- For our talented hygienist, we brought in **Ivory ReLeaf HVE (High Volume Evacuation) System** to allow for safer hygiene procedures by minimizing aerosol risk and risk of backflow.

- Furthermore, we have invested in a UVC Light Devices for PPE sterilization.
